

Life Reflections

Jeffry W. Myers

I am so grateful that I am an inspired visionary artist, teacher, author, and professional photographer. It is our birthright to be empowered, curious, creative and consciously aware.

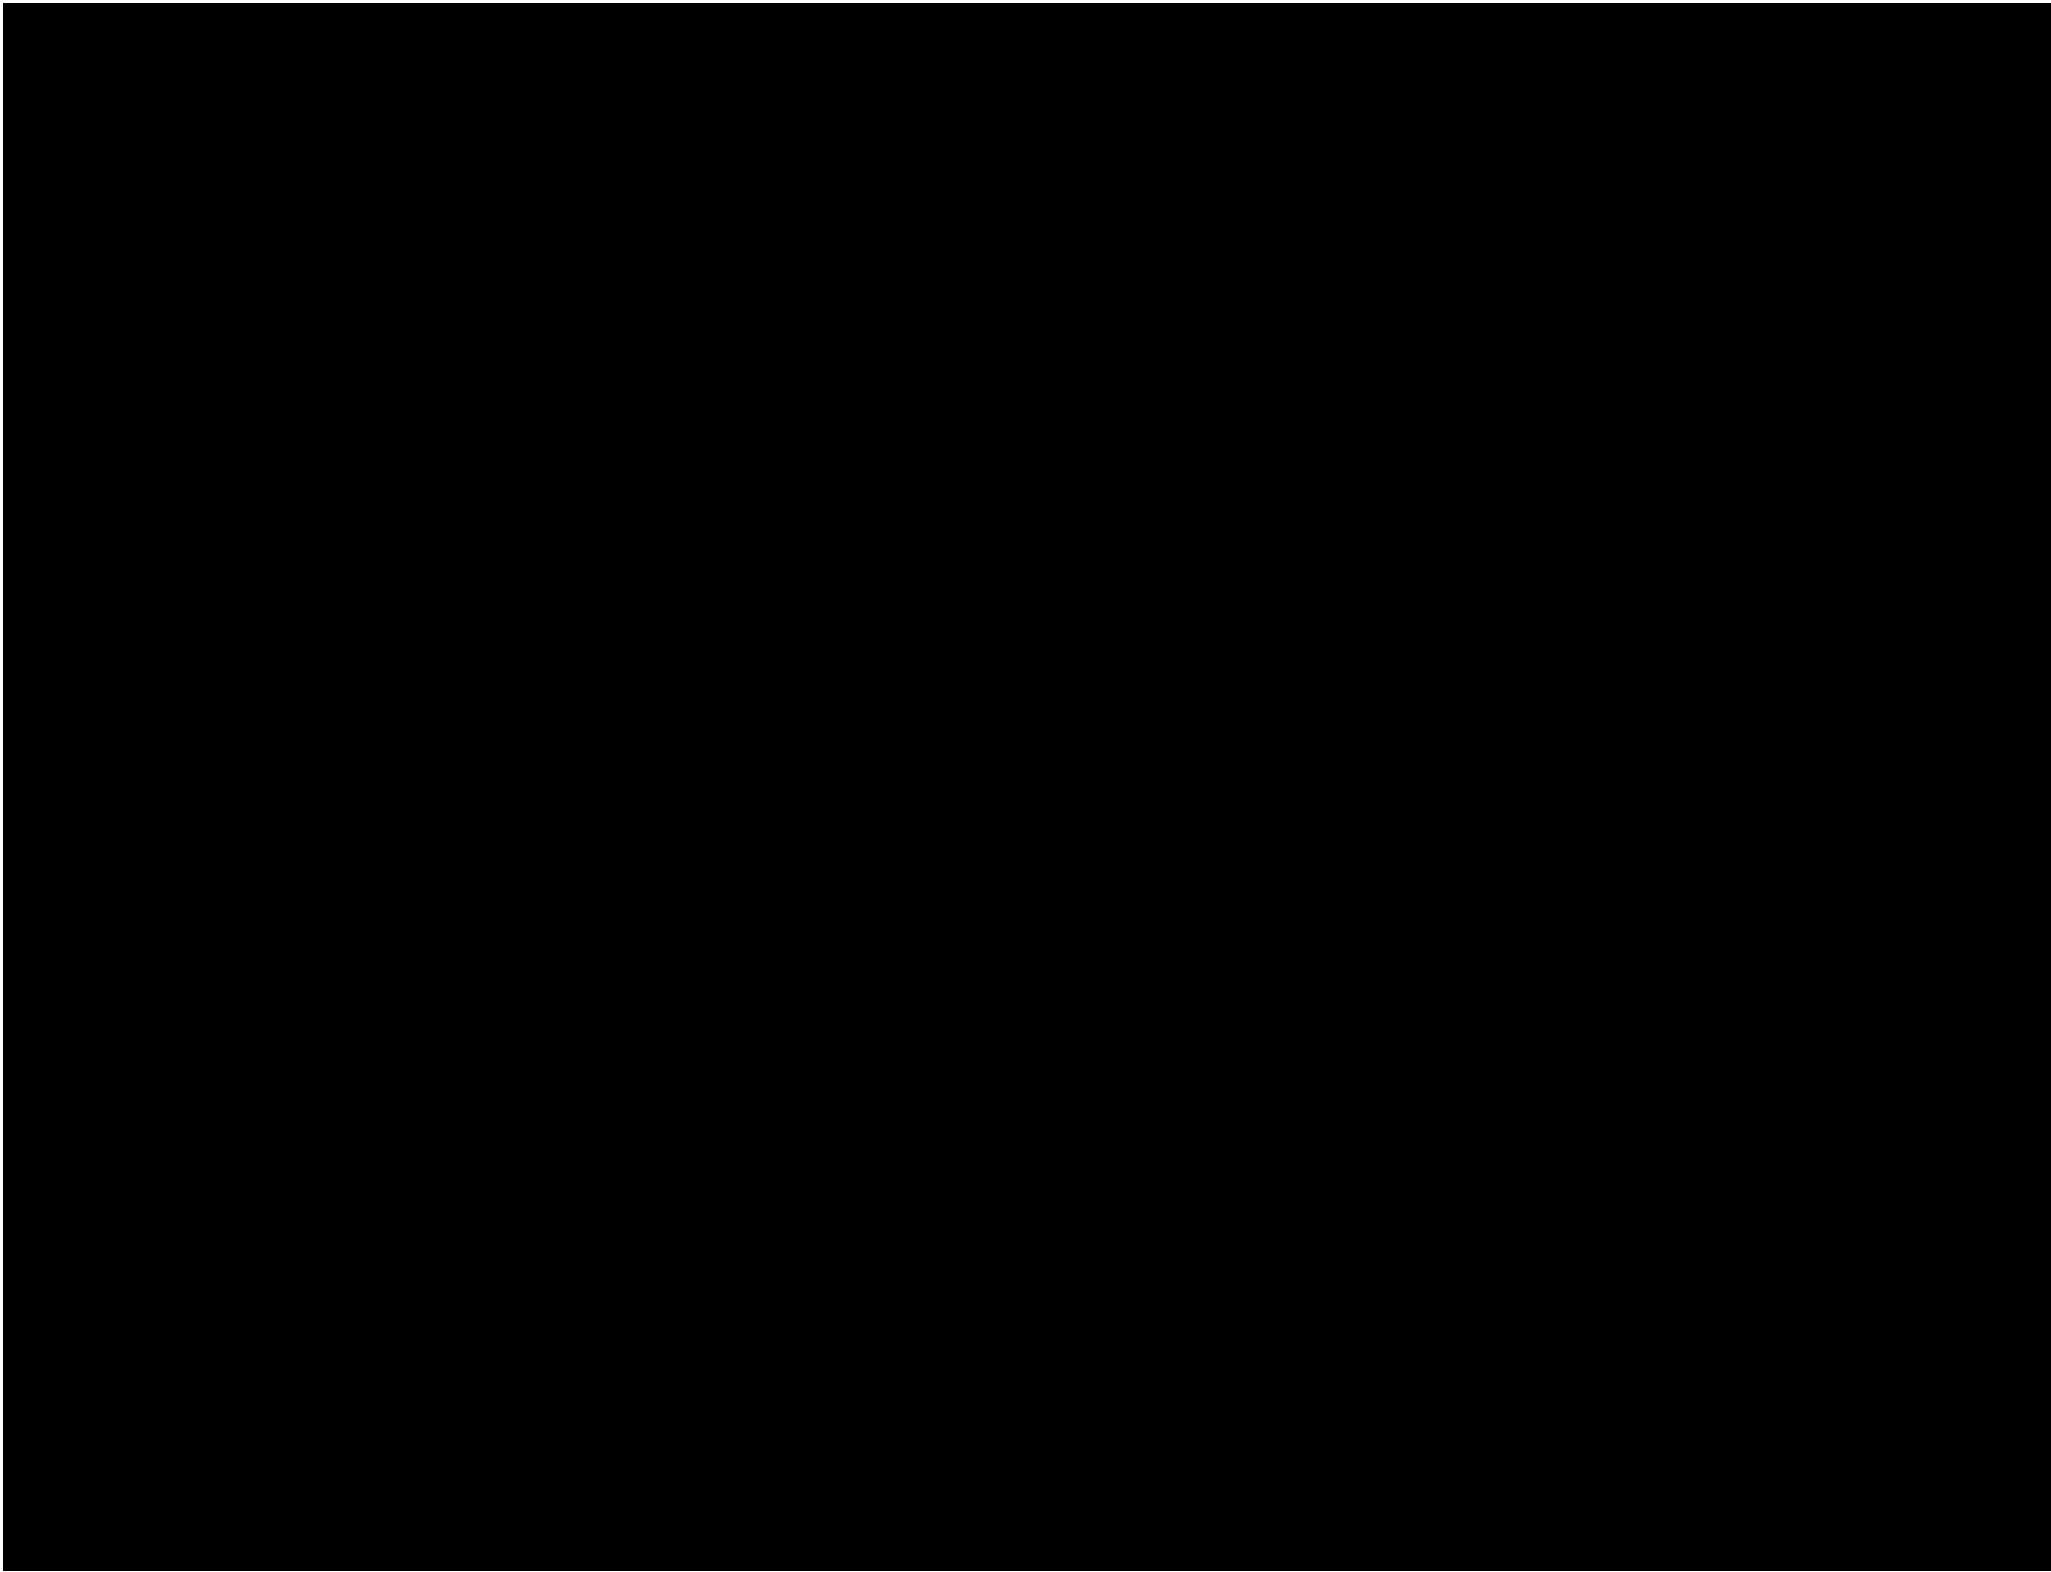

I use my signature strengths of insatiable curiosity, creativity, passion, spirituality and life long learning to bring people together. My dynamic life force and authentic inclusivity connect me with others.

I travel often to destinations of beauty and adventure, continuing to add images and Panoramas to my growing library. My "working vacations" reflect my treasure trove of inspiration, creative self-expression and abundance... all part of my legacy of giving back more than I receive.

To order any of the Panoramas in this book or hundreds of others, contact my website, jeffrywmyers@mac.com

You may also reach me via my phone at 206-325-1767 in Seattle.

Note that custom Panoramas are also available.

As a visionary artist, I create peaceful and healing panoramic images that inspire and empower myself and viewers of my work. These Panoramas are sold all over the world. My latest creations are my “Blended Panoramas”. These images contain between three and ten single photographs that I have taken, softly sewn together to create a new reality. My intention is to tell a visual short story, as I pursue the essence of my subject matter. I explore inner and outer landscapes that reflect the eye of the artist and the soul of a poet. My Panoramas are often loved as vicarious immersions into the natural world.

0069

When I pick up a camera and look through its “magic window”, I honor our ancient ancestors who were hunters and gatherers, by becoming a hunter/explorer who captures and gathers artistic possibilities. I journey through nature, hungry for visual metaphors and symbols that express my love and gratitude for the natural world and beyond.

I believe I empower myself and others with whom I share my vision. My desire is that you, the viewer, discovers and feels the essence of my creative gifts...and possible metaphors they may represent. Presently, my mission is to capture beauty and timeless wisdom and share these attributes with the world.

Each composition contains the elements of harmony, rhythm, and gesture. Thank you for using your curiosity and imagination to immerse yourself today into my world of “created realities”. I salute you for embracing the art world and its unlimited possibilities. If any of my images rock your world, take action to own one...or more than one.
